Customer Reviews

Great book! It was very refreshing to see a book written on a topic which is quite unique in the eBook world. It was quite short but that didn't take away from the value you can get from this book if you're interested in the topic. I certainly was!

This is a short book by Barbara Glidewell. It lists five plants for an herbal garden. It tells how to plant them and the medicinal properties of each.

I enjoyed knowing that I rely on specific herbs to heal me. I have more power in my choices. More to add to my collection.

It's a good start, it would have been nice to have more information on how to save the plants and what to do with them.
