TONS of errors! Not only in the material but all across the practice problems. Every class, the professor hands out a sheet to highlight the errors in the reading/assignment. Honestly, I don't know why he chose to use this book with so many glaring errors. I'm sure this book probably has good material, but that's all pretty much pointless if everything is incorrect...

It is acceptable but it is not new, it is used. I thought it will be new.
